## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 47-59, and 64-75 are rejected under 35 U.S.C. 102(b) as being anticipated by Zhou et al. (US 2003/0044118 A1). Zhou discloses an apparatus comprising a substrate and a multilayer vertically graded refractive index (vGRIN) film and a curved input sidewall and a curved output sidewall (Abstract) (Para [0138]) wherein the apparatus is used to control a vertical focusing and horizontal focusing of electromagnetic beam (Para [0315]). The substrate comprises silicon [0140]. The focusing means is controlled by varying the thickness of the vGRIN structure [0331]. The surface of the curved sidewall is in a cylindrical shape. The spot size is in an elliptical shape [0021]. With respect the various curvature of the lens, Zhou discloses the curvature maybe of various shape [0198].

### *Response to Arguments*

Applicant's arguments filed October 15, 2007 have been fully considered but they are not persuasive. Applicant's only argument pertains to Zhou does not disclose the curved input and output sidewalls. Examiner respectfully points out paragraph [0198] discloses the shape of the waveguide maybe a lens having curves and shapes as long as they achieve the same function. And with all due respect, the cited prior art of record is applicant's own Pregrant Publication which teaches the same inventive concept.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
